travel height

**5-6 persons**  
capacity

**6 Stops**  
landings

# MAKE YOUR HOME MORE ACCESSIBLE

**Installing a home elevator offers countless advantages, particularly for people with mobility constraints.**

It provides them with the autonomy they require to navigate their residences without having to depend on others for help and support.

Beyond providing an easier way to traverse up and down levels, home elevators are also aesthetically pleasing and can add value to a property. They can be customized with various finishes, colours, and materials in order to fit any decor scheme.

Overall, having a home elevator is an excellent way to make life easier while still adding style and improving the overall value of the home.

# TOP 4 REASONS WHY CLIENTS CHOOSE LINEA

## 1

### Wide range of cabin finishes & colours

The Linea home lift range offers a clean and modern selection of finishes, cabin options, materials and accessories to give your home an unmissable touch.

Each lift is designed to reflect your preferences with most elements able to be adjusted to suit your decor.

## 2

### Made-to-measure projects

A versatile home lift which can be adapted to every property: narrow shafts, dedicated areas indoor or outdoor. Linea Lift is a discreet solution to assist the movement within the house.

The cabin dimension vary from a minimum of **800 x 800mm** and a maximum of **1100 x 1400mm**. Linea is able to be fitted into a builder supplied shaft or alternatively with a shaft by Direct lifts with glass or ready to be enclosed by others.

## 3

### Safety and comfort

The Linea lift is fully registered model with Safework / Workcover giving you peace of mind with safety compliance. Each Linea includes a multitude of safety features as required by European and Australian standards. A smart fault log is included as standard feature to monitor the lifts performance so you can be assured of reliable operation long into the future. Battery backup is another standard inclusion which will automatically start if by chance there is a power outage while the lift is in use.

## 4

### Energy efficiency

Linea is a lift designed with low energy and respect for the environment in mind. Compared to other models, it saves money on your power bill and reduces impact on our ecosystem.

- **Class "A"** energy rating according to the German Directive VDI 4707, for energy efficiency in the building industry.
- **95% manufactured** with recyclable materials.
- The Linea Lift with Gearless traction model requires only 0.75 kW, the **same as a small toaster!**
- **Eco friendly home lift:** the CO2 emissions are reduced by 90%
- The Hydraulic Drive allows for exceptional **dimensional flexibility**.
- **Thermally insulated doors are** available for those in cold or hot climates.

# STYLISH & ELEGANT SOLUTIONS

## TAILOR-MADE LIFTS

Each Linea Lift is tailor-made to suit your specific dimensions and preferences from a wide range of finishes/features.

## Simplifying Accessibility

Transform any home or commercial premises into a place that all people can easily traverse. With limited builder's works required, Linea lifts are quick and easy to install, usually within 1-2 weeks.

## Made from Europe's Finest Materials

Architects and industry professionals highly regard the Linea models for not only residential applications but also commercial.

Being produced from Europe's major brands you can be assured of quality as well as ease of sourcing parts long into the future. If you're looking for a bespoke solution that takes your project to new heights, look no further.

We have installed hundreds of lifts in different organisations such as offices, schools, childcare, retail, restaurants, churches and more building types throughout Australia.

**See page 38-43** for actual installs Australia-wide.

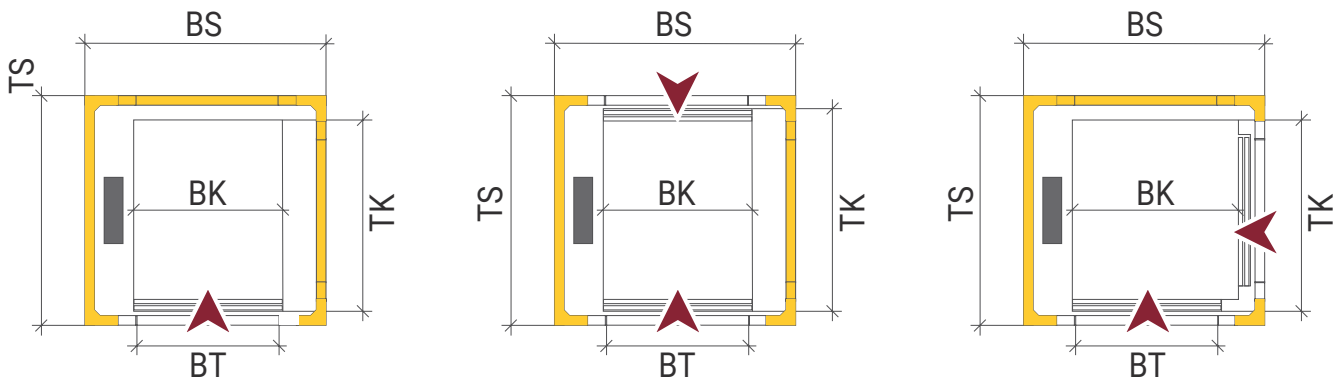

# SLIDING DOOR PLANS

## Automatic Operation with Sliding Doors

## STUD FRAMED SHAFT

### WITH INTERNAL PLY LINING

- 2x Steel support by customer or builder
- Indoor or Outdoor
- Cost-Effective
- Reduced installation time
- Easily sheeted in your choice of material

They are used in residential construction as the most cost-efficient lift shaft method. Direct Lifts will supply detailed drawings with loads for the projects engineer to integrate into the buildings plans. With a commercial project, confirm fire rating/materials required with certifier/fire engineer.

#### Minimum Pit:

Swing Door - 100mm  
Sliding Door Hydraulic - 130mm  
Sliding Door Gearless - 200mm

## MASONRY SHAFT

- Provided by customer or builder
- Indoor or Outdoor
- Fire Rated
- Low Maintenance

Traditional lift shaft design is structurally robust for heavier loads and fire rated.

For more significant effect, the lift car can have glass walls in combination with murals/graphics within the shaft walls.

#### Minimum Pit:

Swing Door - 100mm  
Sliding Door Hydraulic - 130mm  
Sliding Door Gearless - 200mm

## FULL GLAZED SHAFT

- ✓ Provided by Builder & Glazier
- ✓ Usually Indoor Environments
- ✓ 1x Structural Wall & Door Frames Requirements
- ✓ A Bespoke Feature To Any High-End Project

We will supply a detailed drawing and support with the integration of the lift and glazing for a successful result.

A high level of attention to detail is required.

### Minimum Pit:

Swing Door - 100mm  
 Sliding Door Hydraulic - 130mm  
 Sliding Door Gearless - 200mm

## METAL GLAZED SHAFT

- ✓ Provided by [Direct Lifts Australia](#)
- ✓ Indoor & Outdoor Rated
- ✓ Powdered Coated In Any RAL Colours
- ✓ Wide Range of Glass Colours

We can install a finished product with a proprietary engineered frame. A range of glazing profiles is available to suit your preference in appearance.

### Glazing Profiles Available

### Minimum Pit:

Swing Door - 100mm  
 Sliding Door Hydraulic - 130mm  
 Sliding Door Gearless - 200mm

# GEARLESS

Saves **90% less energy** compared to other systems

- Whisper-quiet operation perfect for residential buildings
- Best option for low to high traffic applications
- Smoother ride w/ VVVF controlled electronics
- No oil required with the Gearless Drive
- Re-levelling function to handle load changes
- The emergency automatic rescue device prevents passengers from becoming trapped inside the lift during a power failure.

<b>DRIVE TYPE</b>	1:1 or 2:1 (Heavy Duty) Traction with Low Friction Gearless Motor
<b>STANDARD</b>	NCC E3.6 "Small Sized Low Speed Automatic Lift" AS1735.11, AS1735.12, AS1735.16, AS1735.18

**Greenwich, NSW**

This stunning Linea home lift was installed by our NSW crew for a prestigious private residence in Warriewood, NSW.

When it came to personalizing the interior design and materials of the lift, **the owner enjoyed working with options** such as finishes, colours, and accessible extras to match the house's interior.

The vertical skin plate panel gives the room a modern and elegant vibe that fits with the rest of the house.

Warriewood, NSW

Banksia, NSW

Direct Lifts was contacted by the homeowner, who owns the property at Eleebana Lake Macquarie to provide guidance on the best solution for their needs.

The crew investigated the customer's needs and delivered the most up-to-date European lifts, capable of carrying a **400kg load** and traveling height of **3 meters**.

Lake Macquarie

The previously installed Linea in Newport Queensland features a polished stainless steel finish with an opal back lit ceiling inside the black elevator shaft.

It also has **frameless glass sliding doors** that will provide unobstructed views of the exterior while you're traveling up or down within the home!
